Register. These include a Family Cabin District, a Day Use District, and a Maintenance Area District.

Over the years many new improvements, including a downhill ski area, have been constructed at Black Moshannon State Park. Although these improvements represent intrusions to the original park, the three districts considered for nomination retain their integrity and are excellent examples of the Civilian Conservation Corps' efforts to develop public outdoor recreational facilities.

The Black Moshannon State Park Maintenance Area Historic District contains five buildings, one of which is considered non-contributing. The following resources comprise the district:

Storage/Maintenance	(102-23)	Rectangular, wood frame, gable-roofed
		maintenance building with clapboard siding. Similar to standard, military-designed maintenance buildings.

Garage/Maintenance	(102-24)	Two-story, rectangular, wood frame
		building with clapboard siding. Gabled
		roof. Three-bay garage occupies first
		story. A standard military design.

Gas	Pump House	*	(102-27)	Small, rectangular, gable-roofed building with clapboard siding. Roof extends
				beyond building wall on one eave side to shelter the gas pump. Appears to be
				based upon a standard military design.

Residence	(102-45)	One and one-half story, rectangular,
		gable-roofed house with small addition at one gable end. Clad with aluminum siding.

The non-contributing building is a modern Maintenance Shop (102-81) constructed in 1978.

27. (continued)

logging operations were conducted within the present park boundaries. The present dam, erected in the 1950s, replaced the CCC dam. Black Moshannon State Park opened to the public in 1937.

EVALUATION

The Black Moshannon State Park Maintenance Area Historic District appears to meet Criteria A and C for listing in the National Register of Historic Places. It is associated with the Emergency Conservation Work performed by the Civilian Conservation Corps, one of the most important of the federal relief efforts initiated under the New Deal, an exceptionally significant development in the twentieth century history of the United States. These buildings and structures also exemplify the standardized military designs used by the CCC in non-public park areas.

More specifically, the Black Moshannon State Park Maintenance Area Historic District is significant in the following areas:

Architecture/Landscape Architecture:

These buildings and structures are representative of the CCC's use of standardized military designs for maintenance facilities and other non-public park areas. These buildings served as models for the thousands of standardized structures built by the military during World War II.

Conservation/Recreation:

These buildings and structures have been associated with public recreational facilities for approximately fifty years. They represent the results of a massive federal effort to construct and improve outdoor recreational facilities across the United States.

Politics/Government:

These buildings and structures were constructed by the Civilian Conservation Corps (CCC), one of the most important federal relief programs created under Roosevelt's New Deal. They are thus representative of the federal building programs that constituted one of the major developments of the Depression Era. Built on stateowned property, they also represent an unprecedented cooperation between state and federal government.

Social/Humanitarian:

The buildings and structures constructed by the CCC constitute a massive humanitarian program initiated by the federal government during the depths of the Depression. The construction of these buildings employed thousands of jobless young men, many of whom were homeless before they joined the Civilian Conservation Corps.

The Black Moshannon State Park Maintenance District appears to meet Criteria A and C for listing in the National Register of Historic Places. It is associated with the Emergency Conservation Work performed by the Civilian Conservation Corps, one of the most important of the federal relief efforts initiated under the New Deal, an exceptionally significant development in the twentieth century history of the United States. These buildings and structures also exemplify the rustic style

EVALUATION

of architecture exposed by the National Park Service. This style and philosophy have come to characterize most national and state parks in the United States.

More specifically, the Black Moshannon State Park Maintenance District is significant in the following areas:

Architecture/Landscape Architecture:

These buildings and structures are representative of the CCC's use of standardized military designs for maintenance facilities and other non-public park areas. The standardized designs used and refined in the CCC camps during the 1930s formed the basis for many of the standardized structures built in huge numbers during World War II.

Conservation/Recreation:

These buildings and structures have been associated with public recreational facilities for approximately fifty years. They represent the results of a massive federal effort to construct and improve outdoor recreational facilities across the United States.

Politics/Government:

These buildings and structures were constructed by the Civilian Conservation Corps (CCC), one of the most important federal relief programs created under Roosevelt's New Deal program. They are thus representative of the federal building programs that constituted one of the major developments of the Depression Era. Built on state-owned property, they also represent an unprecedented cooperation between state and federal government.

Social/Humanitarian:

The buildings and structures constructed by the CCC constitute a massive humanitarian program initiated by the federal government during the depths of the Depression. The construction of these buildings employed thousands of jobless young men, many of whom were homeless before they joined the Civilian Conservation Corps.

EVALUATION

This report describes the methods and procedures used by John Milner Associates to evaluate and apply National Register eligibility criteria to Emergency Conservation Work (ECW) architecture constructed by the Civilian Conservation Corps (CCC) in Pennsylvania's state parks between 1933 and 1941.

All buildings and structures constructed by the CCC meet National Register Criteria A and C. The requirements of Criterion A, which states that resources "associated with events that have made a significant contribution to the broad patterns of our history" may be eligible for listing in the National Register, are met by every building and structure constructed by the CCC, since that agency constituted one of the most significant public relief programs of the New Deal, perhaps the most influential event in the past fifty years of American history. Every building and structure erected by the CCC in Pennsylvania's state parks also meets the requirements of Criterion C, which states that resources embodying "the distinctive characteristics of a type, period, or method of construction" may be eligible for listing in the National Most of these resources exemplify the rustic style of architecture promulgated and promoted by the National Park Service during the first four decades of the twentieth century. Those buildings not in the rustic style are examples of standardized, and in some instances prefabricated, military designs. The standardized designs used and refined by the CCC during the 1930s formed the basis for many of the standardized structures built in huge numbers during World War II.

While every building and structure erected by the CCC meets both Criteria A and C for National Register eligibility, many of these resources have lost their integrity of design, setting, or materials. John Milner Associates evaluated all CCC architecture in the Pennsylvania state park system in order to determine which of these resources best convey a sense of the Corps' role in the development of the parks. This evaluation focused upon a determination of the resource's significance within the state, since the framework for the proposed nomination is the state-wide system of parks, and a determination of the resource's integrity of design, setting, materials, and workmanship.

The buildings and structures constructed by the CCC in the Pennsylvania state park system fall into six broad categories; picnic and day use areas, family cabins, CCC camps, administrative areas, maintenance areas, and Recreation Demonstration Areas. The latter were special facilities designed and developed by the National Park Service in order to provide recreational opportunities to underprivileged urbanites. Recreation Demonstration Areas generally consisted of a central administrative and day use area, two to four organized group camps, each of which contained its own administrative area, and four to six unit camps. A unit camp contained campers' cabins, counselors' cabins, latrines, and a unit lodge. Many parks contain resources from more than one of these categories, and in some instances resources are intermingled within a single area without clear distinctions or

demarcations between categories. The buildings and structures erected by the CCC were grouped into these broad categories in order to assure that the full range of CCC activity within the park system is represented in the thematic nomination. Evaluation of integrity took place within the framework of these categories in order to assure that resources of a similar type were compared.

The resources proposed for inclusion within the thematic nomination represent the entire range of CCC construction-related activity within the state park system. All of the six broad categories of buildings and structures erected by the CCC are represented, generally by several of the best and most intact examples that survive. In general, the nomination of historic districts is proposed, rather than individual buildings or structures. Historic districts better represent the CCC's concern with site layout and the relationship between the various buildings required for a specific recreational facility. In three instances entire parks are proposed for nomination. These parks, Colton Point, Ravensburg, and Laurel Hill, display an exceptional level of integrity and possess outstanding collections of architecture that fully illustrate the extent of the CCC's construction projects.

The following sections, arranged according to the Bureau of State Parks' regional breakdown of its facilities, list each park that includes CCC-built architecture and indicate what resources are considered eligible and not eligible for nomination:

REGION 1

Black Moshannon: Three historic districts are proposed for this park.

Black Moshannon has undergone significant alteration since the 1930s, perhaps most noticably through the construction of a downhill ski area. The three proposed districts will include all of the park's CCC-built buildings and structures that are essentially unaltered and retain a significant degree of integrity. The creation of three separate districts, each associated with a distinct use or activity, permits the exclusion of modern intrusive buildings and structures from the districts. The three districts are:

Beach & Day Use District -- This district consists of seven picnic pavilions, four latrines, three pump shelters, a picnic shelter, concession building, bathhouse, and museum. The dam that forms the lake was rebuilt in the 1950s and is not included within this district.

Family Cabin District -- This district consists of twelve cabins, two latrines, a lodge, and a separate cabin.

Maintenance District -- This district consists of three maintenance buildings and a residence.

demarcations between categories. The buildings and structures erected by the CCC were grouped into these broad categories in order to assure that the full range of CCC activity within the park system is represented in the thematic nomination. Evaluation of integrity took place within the framework of these categories in order to assure that resources of a similar type were compared.

BLACK MOSHANNON STATE PARK

Black Moshannon State Park is located in Centre County on PA Route 504, 14.5 kilometers (9 mi.) east of Philipsburg. The park covers 1409 nectares (3481 acres) including the 101 hectare (250 acre) Black Moshannon Lake. The Black Moshannon Division of the Moshannon State Forest surrounds the park.

RECREATIONAL OPPORTUNITIES:

Boating: Non-powered boats and registered electric powered boats are permitted. Non-powered boats must display any of the following: 1) State Park launching permit, available at most State Park offices, 2) State Park mooring permit or 4). Pennsylvania Fish Commission mooring permit or 4). Certificate and number of boat registration. 137 mooring spaces and 4 boat launch areas are provided. Boat rentals are available in the summer season.

Fishing: The lake provides fishing for warm water game fish and panish. Black Moshannon Creek, below the lake, contains trout. Trout fishermen can enjoy their sport in several nearby streams which include Six Mile Run, Black Bear Run, Smays Run, and Bald Eagle Creek located near the park.

Hiking: A 25 kilometer (14 mi.) trail network invites you to explore the park on foot.

Family Camping: The 80 Class A sites of the family camping area are equipped with picnic tables and fire rings and can accommodate either tents or trailers. A sanitary dump sation and centrally located washhouses with flush toilets, showers and laundry tubs are also available. The camping season begins the second Friday in April and ends after the antierless deer season in late December.

Family Cabins: From the second Friday in April until the end of antierless deer season in late December, the park offers 13 rustic family vacation cabins for weekly rentals. The cabins have minimal furnishings, modern stove, refrigerator, electric lights, and a fireplace. Firewood is provided whenever possible.

Half week rentals are also available during the Spring and Fall.

Cabin rentals are limited to Pennsylvania residents during the summer season

Organized Group Tenting: Adult or youth groups of up to 120 people may reserve the group tenting area. Contact the park office for an application.

Hunting: Over 1,200 hectares (3,000 acres) are open to hunting, trapping, and the training of dogs from fall archery deer season through March 31, of the following year

Common game species are deer, wild turkey, bear, grouse, and squirrel.

Exercise EXTREME CAUTION with firearms at all times. This park is used by fishermen, campers and others throughout the hunting season. Pennsylvania Game Commission laws apply

Firearms and archery equipment may be uncased and ready for use by properly licensed hunters only in authorized hunting areas and during those seasons park areas are opened to hunting or under special conditions which may be established by the Department.

The adjacent State Forest land which covers a large area around the park is also open for public hunting.

Picnicking: 374 picnic tables in four separate picnic areas are provided for year-round enjoyment.

Environmental Education: From Memorial Day weekend to Labor Day, a seasonal interpretive program, featuring evening campfire programs and guided nature hikes, is available to the interested visitor. Program schedules and information may be obtained at the Park Office. Ice Sports: Ice skating is enjoyed by many on about a 1 hectare (2 acre) section of the lake. Ice fishing and ice boating are permitted on the rest of the lake. A State Park launching permit is required for ice boats.

Snowmobiling: Registered snowmobiles may use designated trails in the park and State Forest daily after the end of antierless deer season in late December.

Cross-Country Skiing: An 11 kilometer (7 mi.) trail network is used by nordic skiers.

Downhill Skiling: A ski lodge, two Poma lifts and beginner and intermediate slopes make this natural ski slope very popular.

HISTORY:

During the late 1800s there was a small lumbering town called "Antes" located partly within the present park boundary. The town was located on the old Erie Tumpike running between Philadelphia and Erie. The town was comprised of a hotel, the Antes House, which housed the Post Office, a store, a blacksmith shop, school, and a large ten pin bowling alley. The Antes House was the stopping place for the stage coaches and drivers travelling on the tumpike.

The first dam was built by beavers. Later a dam was constructed on the beaver dam site by a lumber company who built a saw mill at the dam. The Black Moshannon area was one of the greatest lumbering areas in the State, and at one time there were over a million meters of logs stored in the lake. Some of the white pine logs cut from this area ranged from one to two meters (3-6 feet) in diameter.

The name Moshannon was an Indian name (Moss-hanne, meaning "Moose Stream"), given to the stream running through the park.

The park is located on the Allegheny Front. The underlying rock formations are of the Pennsylvenia series showing the surface as part of the Pocono formation. Bituminous coal is mined within a few kilometers west of the park, and at one time clay was also mined near the park area.

Development of the park was done mainly by the Works Progress Administration and the Civilian Conservation Corps in the 1930s. The downhill ski area was completed in 1963.

CONCESSIONS:

A boat rental, park store and refreshment stand provide services to park visitors.

EXECUTIVE DIRECTOR

October 16, 1986

Rush Twp., Chairman John A. Shannon RR 3, Box 356 Philipsburg, PA 16866

> Re: Maintenance District, Black Moshannon State Park Rush Twp., Centre County

Dear Mr. Shannon:

We are pleased to inform you that the above named property is part of the Emergency Conservation Work Architecture Thematic Resources Nomination which will be considered by the Pennsylvania Historic Preservation Board for nomination to the National Register of Historic Places. The National Register is the Federal government's official list of historic properties worthy of preservation. Listing in the National Register provides recognition and assists in preserving our Nation's heritage. Enclosed is a copy of the criteria under which properties are evaluated.

Listing in the National Register results in the following for historic properties:

- Consideration in planning for Federal, federally licensed, and federally assisted projects. Section 106 of the National Historic Preservation Act of 1966 requires that Federal agencies allow the Advisory Council on Historic Preservation an opportunity to comment on all projects affecting historic properties listed in the National Register. For further information please refer to 36 CFR 800.
- 2. Eligibility for Federal tax provisions. If a property is listed in the National Register certain Federal Tax provisions may apply. The Tax Reform Act of 1984 revises the historic preservation tax incentives authorized by Congress in the Tax Reform Act of 1976, the Revenue Act of 1978, the Tax Treatment Extension Act of 1980, and the Economic Recovery Tax Act of 1981, which provide for a 25 percent investment tax credit for rehabilitating historic commercial, industrial and rental residential buildings instead of a 15 or 20 percent credit available for rehabilitation of non-historic buildings more than thirty years old. This can be combined with an 18-year cost recovery period for the adjusted basis of the building. Certified structures with certified rehabilitations receive additional tax savings because owners are allowed to reduce the basis by one half the amount of the credit.

The Tax Treatment Extension Act of 1980 provides Federal tax deductions for charitable contributions for conservation purposes of partial interests in historically important land areas or structures. For further information please refer to 36 CFR 67.

- 3. Consideration of historic values in the decision to issue a surface coal mining permit where coal is located, in accord with the Surface Mining and Control Act of 1977. For further information please refer to 30 CFR 700 et seq.
- 4. Qualification for Federal Grants for historic preservation when funds are available. Presently funding is un-available.

Listing in the National Register does not mean that limitations will be placed on the properties by the Federal government. Public visitation rights are not required of owners. The Federal government will not attach restrictive covenants to the properties or seek to acquire them.

Owners of private properties nominated to the National Register have an opportunity to concur in or object to listing in accord with the National Historic Preservation Act and 36 CFR 60. Any owner or partial owner of private property who chooses to object to listing may submit to the State Historic Preservation Officer a notarized statement certifying that the party is the sole or partial owner of the private property and objects to the listing. Each owner or partial owner of private property has one vote regardless of what part of the property that party owns. If a majority of private property owners object a property will not be listed; however, the State Historic Preservation Officer shall submit the nomination to the Keeper of the National Register for a determination of the eligibility of the property for listing in the National Register. If the property is then determined eligible for listing, although not formally listed, Federal agencies will be required to allow the Advisory Council on Historic Preservation an opportunity to comment before the agency may fund, license, or assist a project which will affect the property. If you choose to object to the listing of your property, the notarized objection must be submitted to Larry E. Tise, State Historic Preservation Officer, PA Historical and Museum Commission, P.O. Box 1026, Harrisburg, Pennsylvania 17120, by November 18, 1986.

If you wish to comment on whether the property should be nominated to the National Register, please send your comments to the State Historic Preservation Officer before the PA Historic Preservation Board considers this nomination on November 18, 1986. A copy of the nomination and information on the National Register and Federal Tax provisions are available from the above address upon request.

Sincerely.

LARRY E. TISE

State Historic Preservation Officer

COMMONWEALTH OF PENNSYLVANIA PENNSYLVANIA HISTORICAL AND MUSEUM COMMISSION BUREAU FOR HISTORIC PRESERVATION

BOX 1026 HARRISBURG, PENNSYLVANIA 17108-1026

Re: E.C.W. Thematic Resources

(list attached)

Dear M. Dannon:

Your completed historic resource form for the above named property has been reviewed by the Bureau for Historic Preservation staff. From the material submitted, the resource appears to meet the National Register criteria and to have a nomination priority as established by the Historic Preservation Board.

The next step in the registration process is the completion of a National Register nomination and submission to the Bureau for Historic Preservation. The nomination form and detailed instructions are enclosed. Please read the instructions and the attached specific evaluation carefully. Under our system, the research, writing and typing in completion of the form are responsibilities of the applicant, and it is essential that the information in the form be accurate and that the completed form include all information and supplement material discussed in the enclosed instructions. Because of the amount of work involved, you may wish to consider hiring a professional consultant to assist you. (A list of consultants is available from the Bureau for Historic Preservation on request.)

Once a high quality, complete nomination has been submitted to the Bureau, we will schedule the property for review by the Historic Preservation Board, a committee of professionals from across the Commonwealth. They may approve the property, reject it or request additional information. If approved the nomination form will be sent to the National Park Service for final review prior to listing in the National Register.

If you have any questions on the nomination procedure or the completion of the forms, please write or call the Bureau at (717) 783-8946.

Sincerely,

Greg) Ramsey,\Chief

SPECIFIC EVALUATION

YAME:_	Emer	gency	Conser	ration V	Work	Architec	cture in	Per	nsylvania	
LOCATI	ON:	State	Parks,	1933-1	942	Thematic	Resource	es,	statewide	

NATIONAL REGISTER CRITERIA

The quality of significance in American history, architecture, archaeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and:

- X A. that are associated with events that have made a significant contribution to the broad patterns of our history; or
- _____3. that are associated with the lives of persons significant in our past; or
- X C. that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- _____D. that have yielded, or may be likely to yield, information important in prehistory or history.

Areas of Significance: Conservation, politics/government, recreation

Period of Significance: 1933-1942 Landscape architecture, architecture

Comments: In the opinion of the Bureau for Historic Preservation the above

theme appears to meet the National Register criteria. This period and phenomenon
in the history and development of Pennsylvania's state park system appears to have
been very significant. The twenty-four historic districts and four individual
properties proposed in this nomination appear to also meet the criteria. Please
see attached list of these resources. At the time of this evaluation field work
had not been completed in Clear Creek, Cook Forest, Raccoon Creek, World's End
and Pymatunig State Parks. Also please note that we are looking forward to a
supplemental evaluation report covering the 7 parks included in the 1983 survey
but not referenced in RFP for this project.
